About Me

Experienced software developer with 5 years of expertise in developing, debugging, and testing web applications. Proficient in both frontend and backend development, with a strong background in API integration and microservices. Skilled in utilizing npm packages and working with cloud platforms like AWS. Proficient in ReactJS, Python, Node.js, and MySQL.

Professional Experience

Value Labs | BackEnd Developer

May 2023 – Dec 2024

- Contributing as a backend developer for a streaming client, focusing on the subscription creation, updation process within a microservices architecture.
- Utilizing Node.js and AWS services such as Lambda, Step Functions, RDS, in addition to tools like New Relic and Zuora.
- Developing new features and resolving bugs to optimize subscription creation efficiency.
- Crafting and executing comprehensive unit test cases to validate the reliability and functionality of implemented features.

Primary Skill

- Node Js
- Javascript
- Aws
- Git, Github

Secondary Skill

- React Js
- Mysql
- MongoDB
- Python

Education Background

- Bachelor of Technology
Electrical and Electronics Engineering
Completed in 2017
65%
- Intermediate
MPC
Completed in 2014
89%
- Tenth Standard
English Medium
Completed in 2011
89%

TCS | FullStack Developer

Feb 2019 – May 2023

- Functioned as a Fullstack developer, spearheading the development of a test application tailored for test execution and data retrieval.
- Leveraged a tech stack comprising React, Python, and Node.js to architect and implement the test application.
- Utilized AWS cloud services, including AWS Lambda, Step Functions, and DynamoDB, to facilitate seamless integration and scalability of the application.
- Composed comprehensive unit test cases and conducted end-to-end testing to ensure the robustness and reliability of the application across various scenarios.
